Loss of the South Seaman.—Mr. Editor: I beg to give you the following particulars relative to the loss of the ship South Seaman, under my command, on the French Frigate Shoal We left here on the 10th inst. bound to the Ochotsk Sea. A. M. on the 13th, the ship struck on the above shoal. She was going at the rate of from 10 to 11 knots, with strong trade winds, all sail on, and steering W. S. W. I judged myself, from obserations taken the previous day, to have been forty miles west of Basse Island. As soon as she struck, we cut away her foremast. She beat up on the coral reef till she lay in six feet water. In about two hours after striking she bilged. As our masts went, the sea took away our bow and waist boats. At daylight we got the larboard boat inside the reef with a towline and boat anchor; took the boats down from overhead and hauled them through the breakers by the line. The third boat which was got clear of the ship was awamped with some ten or twelve men. After drifting through the reef she was anchored bottom side up. The sea was so heavy, breaking over the ship, that it was very dangerous to leave her. We succeeded in saving two barrels water, about four barrels bread, and some two or three boxes fresh meats, together with my chronometers, charts, quadrants, and papers. After bailing out the boat that was anchored, we divided the men in the five boats. It was now so rugged that we were obliged to leave to prevent being swamped. We steered for Guam. About two hours after leaving the wreck we discovered a whale boat pulling towards us, which proved to belong to the schooner Kamehameha IV., belonging to this place. They had seen the wreck at daylight and were coming to our relief. We were kindly received by Capt. Foss, who brought twelve of the crew to this port, and I would take this occasion to express, on behalf of my-self, officers and crew, my heartfelt thanks to Capt. Foss, Mr. Fetters and Mr. Beatty, for their assistance to us after leaving the wreck, and attention during the passage here. Yours, truly, THOS. H. NORTON.

Late Master ship South Seaman From observations taken on board the schooner, I make the islet in lat. 23 40, long. 166 16. My chronous here were proved to be correct.—P. C. Ade ometers, on my arrival
